

MN. 022.C Reduction Mammoplasty

Original Implementation Date : 08/01/2023

Version [C] Date : 07/15/2026

PARP Approved Date: 06/09/2026

Last Reviewed Date: 07/15/2026

Thank you for being a valued provider for members in one or more of our health plans: Jefferson Health Plans Medicare Advantage, Jefferson Health Plans Individual and Family Plans, Jefferson Health Plans CHIP, and/or Jefferson Health Plans EverWell (our Medicaid plan).

PRODUCT VARIATIONS

This policy only applies to Jefferson Health Plans EverWell & Jefferson Health Plans CHIP product lines.

This policy does not apply to Individual and Family Plans (ACA) product.

Medicare Variation LCD L35001 Reduction Mammoplasty applies for Medicare LOB.

POLICY STATEMENT

REDUCTION MAMMOPLASTY

The plan considers reduction mammoplasty medically necessary for non-cosmetic indications for women aged 18 or older or for whom growth is complete (i.e., breast size stable over one year) when *any* of the following criteria listed below are met:

Macromastia

1. Member has at least **one** of the following conditions/symptoms directly attributed to macromastia and affecting daily activities for at least 1 year:

- a) Shoulders, upper back/neck pain/or ulnar nerve palsy for which no other etiology has been found on appropriate evaluation.
- b) Skin breakdown/infection (intertrigo, dermatitis, eczema, or hidradenitis) at the inframammary fold.

2. All the following criteria must be met:

- a) Member has severe breast hypertrophy, documented by high-quality color frontal-view and side-view photographs; *and*
- b) There is a reasonable likelihood that the member's symptoms are primarily due to macromastia; *and*
- c) Reduction mammoplasty is likely to result in improvement of the chronic pain; *and*
- d) Symptoms of pain persist as documented by the physician despite at least a 3-month trial of conservative measures such as:

Analgesic (non-steroidal anti-inflammatory drugs (NSAIDs) and/or muscle relaxants; supportive devices (e.g., proper bra support, wide bra straps); orthopedic or spine surgeon evaluation of spinal pain, physical therapy, chiropractic care or osteopathic manipulative treatment, etc.

- e) Skin problems persist as documented by the physician-breakdown/infection (intertrigo; dermatitis; eczema or hidradenitis) at the inframammary fold despite of physician supervised therapy for at least 3 months with the appropriate dermatological treatments, such as topical and /or oral antibiotics, antifungal, corticosteroids along with conservative measures (e.g., good skin hygiene, adequate nutrition).
- f) For women **age 40 or older**, or for younger patients with a significant family or personal history of breast cancer, a mammogram negative for cancer within two years of date of the planned reduction mammoplasty is required; *and*
- g) The surgeon estimates that the average grams of breast tissue to be removed per breast are above 22nd percentile on the Schnur Sliding Scale (see table 1) based on the individual's body surface area (BSA).
- h) Preoperative photographs show the presence of:
 - Significant breast hypertrophy.
 - Shoulder grooving from bra straps and/or intertrigo.

POLICY GUIDELINES

REQUIRED DOCUMENTATION

The patient's medical record must reflect the medical necessity for the care provided. These records may include, but are not limited to, records from the provider's office, hospital, nursing home, home health agency, therapies, and test reports.

We may conduct reviews and audits of services to our members, regardless of the participation status of the provider. All documentation must be made available to the Company upon request. Failure to produce the requested information may result in a denial for the service.

All requests for reconstructive breast surgery and reduction mammoplasty require review and must include documentation not limited to, color photographs, a letter of medical necessity from the provider, member's medical records regarding previous treatment, and other professional provider's reports.

Body surface area and average breast tissue removed above 22nd percentile.

Body Surface Area (m ²)	<u>Average grams of tissue per breast to be removed</u>	Body Surface Area (m ²)	<u>Average grams of tissue per breast to be removed</u>
1.35	199	3.10	4351

BENEFIT APPLICATION

Medical policies do not constitute a description of benefits. This medical necessity policy assists in the administration of the members' benefits which may vary by line of business. Applicable benefit documents govern which services/items are eligible for coverage, subject to benefit limits, or excluded completely from coverage. This policy is invoked only when the requested service is an eligible benefit as defined in the Member's applicable benefit contract on the date the service was rendered. Services determined by the Plan to be investigational or experimental, cosmetic, or not medically necessary are excluded from coverage for all lines of business.

DESCRIPTION OF SERVICES

Reduction mammoplasty is a surgical procedure used to treat female breast hypertrophy (i.e., macromastia or gigantomastia). The surgery involves the excision of a portion of the breast, including the skin and underlying glandular tissue, to reduce the size, shape, and weight of mammary tissue. Macromastia is defined as a marked, abnormally excessive, pendulous enlargement of one or both breasts. This condition may result in pain of the shoulder, neck, or back, nerve compression of the arms, and recurrent intertrigo in the mammary folds.

CLINICAL EVIDENCE

DISCLAIMER

Approval or denial of payment does not constitute medical advice and is neither intended to guide nor influence medical decision making. Policy Bulletins are developed to assist in administering plan benefits and constitute neither offers of coverage nor medical advice. This Policy Bulletin may be updated and therefore is subject to change.

For Jefferson Health Plans EverWell and Jefferson Health Plans CHIP products: Any requests for services that do not meet criteria set in PARP will be evaluated on a case-by-case basis.

POLICY HISTORY

This section provides a high-level summary of changes to the policy since the previous version.
